We have raised all parents' concerns and urgent issues that need to be resolved, in addition to fundraising, organizing some enriching webinars, have helped in facilitating and moderating a number of PTA webinars. I also support open lines of communication as a tool to improve the overall school culture. **Annex 3****Mrs. Abla Sakka**

As a proactive parent and class mom for the past three years, and with my extensive experience in education, I kindly request to be considered as a member of the ABS PTA. I would like to take this opportunity to represent the primary stage, support in the implementation of the school's mission and vision, liaise between parents, students and the school, and collaborate with other members of the school PTA towards continuously developing and enhancing the learning experiences of our students.

My passion for education has been embedded in me for as long as I can recall as I stem from a line of educators from both sides of my family. With a background in university counselling, I firmly believe that education should encompass children holistically and the decisions made today will impact students throughout and beyond their school years. Each member of the school community has a responsibility to create a supporting, dynamic and challenging learning environment for our children. Whilst it is important for individual members to contribute to the school community, I believe that working within a team will have a more effective impact on the school community and the PTA is the perfect opportunity for just that.

ABS is exceptionally dear to us and I aim to take on an active role, going above and beyond for what is in the best interest of our community. I hope to be able to represent ABS, not only as proud parents but also as a member of the PTA.

Positive wishes,  
Abla Sakka
